## SUMMARY

I'm a fresh graduate Information Systems with Product Owner Internship experience. I'm highly organized and work effectively in fast-paced, collaborative environments. I'm passionate about Product/Project Management and eager to contribute my skills to innovate product/projects and help organizations achieve their goals. Additionally, I have a keen interest in Business Analyst and System Analyst, recognizing their importance in aligning technology solutions with organizational objectives.

## EDUCATION

**Tarumangara University (UNTAR)**

Aug 2019 – Aug 2023

- **Bachelor of Information System**
- GPA: 3.63 / 4.00

**Virtual Training and Learning Development / Certification**

- EY Ripple Indonesia: *Data Visualization Workshop*
- [Revou Mini Course : Intro to Product Management](#)
- [Revou Mini Course : Intro to Data Analytics](#)

## WORKING EXPERIENCES

**Product Owner Intern, IDStar Cipta Teknologi**

Feb 2023 – Aug 2023

- Contributed to a talent management application for client, achieving **zero-bug production** and enhancing two internal finance apps for a **30% productivity boost**.
- Defined clear requirements using **PRD and Flowchart**, transforming user problems into accessible user stories for stakeholders and the development team.
- Collaborated with senior management and stakeholders to define project scope, goals, and deliverables aligned with business objectives.
- Worked with cross-functional teams and stakeholders to manage and prioritize user stories, maintaining the product backlog using **agile methodology** practices.
- Employed tools such as **Figma** for user experience design, **Jira** for agile project management, **Google Sheets** for collaborative documentation, and **Postman** for seamless API integration.
- Planned and executed end-to-end development cycles using Scrum methodology, including requirements gathering, PRD development, user experience design, backlog grooming, sprint planning, development, UAT and SAT, and deployment.

## LEADERSHIP / ORGANIZATIONAL EXPERIENCE

**Vice Chairman, at PFT (Perhimpunan Fotografi Tarumanagara)**

Aug 2022 – Aug 2023

- Assisted Chairman to take executive decision and supervised the decisions of others committee members in carrying out work programs, preparing documents to college funding within one organizational period.
- Led or represent the organization at various events, meetings, and functions, especially when the Chairman is unavailable.

**Chief Executive, MAKRAB (Malam Keakraban) at PFT**

Sept 2022 – Oct 2022

- Led 13 committees in planning and coordinating all aspects, including accommodation, transportation, and events for over **100 PFT members**.
- Created and promoted marketing materials, increasing event participation by **40%**.

**Coordinator of Exhibition & Competition division, PFT**

Aug 2021 – Aug 2022

- Led sub-committees for student photo events to promote active photography participation and confidence.
- Collaborated with the Student Court Organization to make a **National Level Competition** that participated by 50+ people.

**Community Service, BEM FTI (Fakultas Teknologi Informasi)**

Aug 2021 – Aug 2022

- Created work programs to remind college student to be more prepared for their work application with a guide on using LinkedIn and CV with 4 other committee members.

## ACADEMIC PROJECTS / RESEARCH EXPERIENCE

**UNTAR-Thesis: Traffic Law Chatbot FAQ**

Feb 2023 - Jul 2023

- Developed a Chatbot FAQ About Traffic Law in Indonesia using **Dialogflow** which uses **NLP** Language.

**UNTAR: Market Price Data Analysis**

Sep 2022 - Oct 2022

- Developed a data visualization regarding the increase in chili price with the weather using **Power BI**.

**UNTAR: Technology Based Business Proposal Competition 2021**

Aug 2021 – Oct 2021

- Collaborated with 4 other students to create **SewaCart**, a platform that eases customers to rent daily items from an app.

**UNTAR: Final Project Website**

Sep 2020 – Oct 2020

- Developed a company website that has the intention to showcase the company's product.
- Utilized **HTML** and **CSS** to build the front-end and **PHP** and **SQL** database to develop the back end.

**UNTAR: Bank Application Prototype**

Sep 2020 – Oct 2020

- Created a bank application prototype that has several features such as deposit or withdraw of money using **Java** which utilized **Object Oriented Programming** with **IntelliJ IDEA**.
